PERSONAL BULLETIN NO. 7 - November 5, 1956

Dear Associate:

As you know, this personal bulletin service was intended primarily for use in case of a rigid censorship, interruption of mail service for any reason, or important happenings not reported in our regular publications. We have not issued such a bulletin for several months, since conditions have not seemed to justify it - and that may seem true of this present one also. However: -

The Probert Controls believe there will be NO WORLD WAR arising from the conflict of Israel and Egypt - though there may be a localized struggle in that area.

"There is much talk and a strong probability that the Egyptians will destroy the Canal if Egypt is hard-pressed." (*)

All the Powers now understand that a general war with nuclear weapons would mean the end of all life on our planet. Russia has been visited and informed by the Etheric people -- and Russia's desire for friendly relations with other nations is at this time genuine. (**)

ISRAEL has been primed for actual warfare by both France and England.
Control of the Canal is the basic cause of dispute - and this on account of the enormous expense of any other traffic route.
All the satellite countries of the Russian Empire will seek freedom. . . In the more remote future Communist China will seek the control of all China.

As to the increase in "obsession cases": bear in mind that many of these are obsessions by entities living on your own plane in physical bodies.

All the foregoing statements are by the Probert Controls and have been made on and since October 31, to November 2, 1956.

NOTE: * At this writing the Canal is said to be obstructed by several sunken vessels: details not available.
** It must be admitted that so far this 'friendly' attitude has not been evident. Events are moving too fast for worthwhile comment.

The "landing of giants" in the Cordilleras gains probability from huge footprints and from the reported passage of strange aircraft, length estimated at 300 meters (900 feet), over the same general area. Reported in Flying Saucer Review II-5,Sept.-Oct., '56. Pg. 17.

(F.S. REVIEW: obtain from Box 3-B, 55 West 92nd St., NYC 25, N.Y. Highly recommended) (Bi-monthly, $3.50). (This is a London 'slick paper' publication). The Probert Controls say they have no reason to expect anything unusual on the night of Nov. 7 (10:30 P.M.,Los Angeles area). This story has gone all over the world - and since this is the third of November, we quote the Controls for the record.-They do not claim omniscience. . . . . Vanished into "total blackout". Assoc. Riley Crabb quotes Frank Edwards as saying that number of planes so disappearing is "OVER 200". Charles Marcoux and others comment on Flight 101, a twin-engine craft that landed on schedule in Chile - a perfect landing but without radio contact, & the plane was empty, all chutes unused and in place. Who landed, cut out the engine, and where did they go? Someone did not want the plane to be 'missing' and a search made for it???

Most important recent publication is SPACEMEN, FRIENDS & FOES, by TREVOR JAMES -- Brochure in two parts: BSRA Hdqrs.(-Plain & somewhat disturbing facts which should be read and evaluated.)-($2.00). /-addr.: 3524 Adams Ave., San Diego 16, Calif. --

The role of spiritism and spiritualism in the matter of the UFO has been confused and uncertain, largely because thousands of astral intelligences (excarnate humans) have seized the opportunity to give "information" and "advice" beyond their own powers. Yet it will not do to disregard such sources, in view of the quandary of science and orthodox religionism. Further, many phenomena of spiritualism and psychism seem to be duplicated (and so in a sense validated) by the "space people" (telepathy, clairsentience, teleportation, materialization, et cet.) And the almost infinite variety and complexity of "psychic phenomena" (spiritualism) has been augmented rather than clarified by the UFOs.

Commentators in the BSR publications have long recognized the development of this situation; and the upshot has been (1) a ten-year study of the Mark Probert mediumship (2) a careful reticence about placing undue value and authority on statements of the communicators - which must stand on their own "feet". To these acceptances we have gradually added a conditional recognition of several astrals, (NOT excarnate humans), and among these are Ashtar - and Andolo, from whom I quote below:

(Andolo speaking) 'I have additional information for you, for the next two weeks' (up to first week in November, approx.) concerning the activities of the dark ones. There will be a renewed assault on your aircraft.... activity in the form of fireballs (theirs, not ours, Ours are nullifiers, not weapons) starting fires & causing other damage. These may not be dropped in flaming form but are placed in certain locations by the astrals in invisible form and later exploded. This will explain many strange industrial fires. But do not elaborate personally on the newspaper reports (so that allegation cannot be made by your enemies that you are inventing or misconstruing natural happenings).' . . .

This is part of a communication by Andolo, to the intermediary Trevor James, whom we quote at more length in Round Robin next (xii-4). The actual press record of fires and plane accidents for the 2-3 week period mentioned justifies close attention.

Our Associate H.K.H., of Melbourne (address on request) sends us a memo, of a prediction, presumably by an astral entity, received nearly 25 years ago but strongly applying to the present time:

"You people(HKH and wife) are lucky because you know in advance. You will live to see people all about you going out of their minds because of terrifying apparitions in your sky, fearful monstrosities, gigantic a n d horrifying". . . . "Farmers will not know when to seed, nor how to cope with fruit trees which will flower when they shouldn't; crops of all kinds will be lost due to a great change in climatic conditions." (H.K.H. supports this last prediction b y comment on actual climatic changes in Australian climate during the last 40 years).

In a two-page bulletin of this sort I cannot, of course, attempt to argue the case or prove anything concerning the malevolence and repulsive character of some of the entities now manifesting with increasing frequency. The universe swarms with life, and new physical conditions (of the ethers and complex energy-fields) evidently permit a host of intruders. THE IMPORTANT PURPOSE OF THIS BULLETIN IS MONITORY. THESE VISITING ENTITIES ARE BOTH GOOD AND EVIL, INDIFFERENT OR MALICIOUS. No single description covers all of them. Be especially careful of cigar-shaped craft with white and/or blue lights or intense inner white glow - and of discs or other objects released by them. Abductions (persons, animals, objects) are frequent. Never attack, but keep clear and beware of close contacts. The information in the Trevor James brochure SPACEMEN (last paragraph pg. 1, this Bul.) is imperative; if BSR Hdqrs. had the funds we would send free copies to all Associates. But we do not publish this ourselves nor fix the price. . . . The Probert Control Yada di Shi'ite confirms the SPACEMEN brochures as essentially correct. DIVOBEQUA -Meade L.-

NOTE: Envelops for PB-7 sealed with scotch tape at one end are "O K"; envelopes were gummed.
